 Profile

As a proactive and adaptable software engineer, I thrive on embracing new challenges and staying abreast of cutting-edge technologies to enhance my career growth. Committed to adding significant value to my employer, I consistently seek opportunities to elevate my skills and contribute to the organization's success.

 Professional Experience

06/2025 – Present Hyderabad	Consultant, Deloitte - Collaborated with cross-functional teams to successfully deliver comprehensive solutions for clients. - Managed client relationships through regular check-ins and updates on project progress. - Evaluated client needs and expectations, establishing clear goals for each consulting engagement. - Developed innovative strategies for clients, resulting in increased revenue and business growth.
03/2022 – 06/2025 Bengaluru, India	Full Stack Engineering Senior Analyst, Accenture  - Designed and implemented complex features aligned with detailed specifications, ensuring high performance and scalability. - Debugged and resolved issues across development, testing, and production environments, ensuring seamless functionality. - Engineered robust software solutions for new features and critical bug fixes. - Developed comprehensive unit test cases and documentation using tools like Jasmine and Karma. - Delivered high-quality, reusable, and scalable code adhering to industry best practices. - Led project meetings, managed the request-for-comment process, and provided technical leadership. - Supported team initiatives, including onboarding and mentoring junior team members. - Mentored and guided software engineers while actively participating in hiring top talent. - Monitored team metrics, contributing to timely feature and fix delivery.
09/2020 – 03/2022 Bengaluru, India	Full Stack Engineering Analyst, Accenture - Developed and maintained user-facing features using HTML, CSS, SCSS, and JavaScript, ensuring responsive and visually appealing designs. - Built scalable front-end architectures using Angular (v8+) and TypeScript to deliver modular and maintainable applications. - Implemented and optimized reusable, component-based design patterns for enhanced code modularity and maintainability. - Applied Object-Oriented Programming (OOP) principles to deliver high-quality, robust, and scalable codebases. - Collaborated with back-end developers to integrate RESTful APIs and ensure seamless end-to-end functionality. - Optimized web applications for speed, scalability, and cross-device responsiveness. - Troubleshooted and resolved front-end performance bottlenecks and critical bugs to enhance user experience. - Developed comprehensive unit test cases with Jasmine and Karma to maintain code quality and ensure zero regressions. - Contributed to agile development practices by participating in sprint planning, code reviews, and daily stand-ups. - Ensured accessibility and adherence to web standards for improved inclusivity and compliance. - Partnered with cross-functional teams to align technical solutions with business requirements.

Education

2016 – 2020
Coimbatore, India

Karunya University, *Computer Science Engineering*

Skills

Programming Languages

Typescript
Java
Python
C#
JavaScript
SQL

Libraries/Frameworks

Angular
ASP.NET Web API
jQuery
D3.js
Azure
AWS

Tools / Platforms

Visual Studio
Postman
PgAdmin
Visual Studio Code
Jupyter

Databases

MySQL
PostgreSQL
MongoDB

Development Traits

Agile Methodology
OOPS
Data Structures
Algorithms
Web Development

Highlight Skills

Application Monitoring
Front End Development
Scalable Architecture
Memory Management
Software Development

Certificates

AI-900 Azure AI Fundamentals 

AZ-900 Azure Fundamentals 

Projects

Asset Data Hub, *Angular, ASP.NET, D3.js, Knowledge Graphs, Azure Functions, Stardog*

Asset Data Hub

- Developed a Data Analytics Web Application, taking full control of UI development from scratch.
- Created a variety of data visualizations for the application, including **Bubble Charts**, **Visual Tree Mapping Charts**, and **Hierarchical Charts**.
- Designed and implemented new features to enhance application performance, introducing **lazy loading**, **typeahead**, and **virtual scrolling**.
- Executed end-to-end feature development, ensuring seamless integration with a focus on scalability and modularity.
- Conducted unit testing using **Jasmine Framework** and **Karma Config**, ensuring high code quality and leveraging tools like **SonarQube** for code quality assessment.
- Replaced **Power BI charts** with **D3.js diagrams**, resulting in a cost saving of \$5,000 for the project.
- Leveraged advanced **D3.js techniques** and implemented tree and graph data structures to create dynamic and visually appealing graphs.
- Engaged directly with clients to understand their business needs and establish critical project milestones, ensuring alignment with objectives.
- Spearheaded the implementation of **NUnit** and **Jasmine Karma tests**, significantly boosting code coverage and application reliability.
- Fostered seamless communication and collaboration within cross-functional teams to comprehend complex architecture, business requirements, and priority deadlines.
- Led the development of robust **Angular components** using **TypeScript** and **Bootstrap**, integrated with **ASP.NET**  to retrieve, process, and deliver data from databases based on user inputs.

SaaS Web Application, *Angular, ASP.NET WebAPI, PostgreSQL, Bootstrap, PowerBI*

- Developed a SaaS Web application from end to end, ensuring robust and scalable architecture.
- Designed and implemented a secure authentication layer using **MSAL (Microsoft Authentication Library)** to enhance security and streamline user access.
- Integrated **Power BI graphs** into the application for advanced and dynamic data visualization.
- Consistently delivered requirements and resolved defects within deadlines, maintaining high project standards and client satisfaction.
- Handled running and maintaining **CI/CD pipelines** in **Azure DevOps**, ensuring efficient and reliable deployment processes.
- Utilized version control tools such as **GitHub** and **Azure Repos** within **Azure DevOps** for seamless code management and team collaboration.
- Improved application performance by 80% through the introduction of **Shared Modules**, simplifying complex logic, and removing boilerplate code.
- Developed scalable and modular application components from scratch using **Front-End and Back-End technologies**, including **Node.js**.

Detection of Alzheimers using Image Processing and Connectomes, Python, Deep Learning, NumPy, Pyplot

- Gathered MRI data from the ADNI database, ensuring comprehensive data collection for analysis.
- Conducted data cleaning and processing to maintain accuracy and reliability of the dataset.
- Applied Convolutional Neural Networks (CNN) to develop predictive models, enhancing the ability to analyze and interpret MRI data.
- Technologies used: Python, NumPy, PyPlot, Pandas, CNN.

 Achievements

ACE'23 Extra Mile Award for offshore Individual, Accenture

ACE'22 Performer of the year Award, Accenture
