+91-8639912976

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, SQL, TypeScript

Frameworks: React, Node.js, Angular, ASP.NET Web API

Developer Tools: Git, Gitlab, Kubernetes, Azure, PostgreSQL, Redis, Jira

Architecture & Concepts: Microservices, Latency Optimization, Micro Frontend Architecture, System Design, Data Structure, Algorithms

EXPERIENCE

Deloitte

Consultant

Hyderabad

June 2024 – Present

- Accomplished [X], as measured by [Y], by doing [Z] (e.g., Optimized database indexing strategies, reducing API response times by 35% under a peak simulation load of 10k concurrent requests).
- Refactored legacy monolithic **test** modules into modular microservices using Docker, decreasing deployment failure rates by 18% and local spin-up latency.
- Collaborated with cross-functional product teams to implement custom caching layers using Redis, boosting overall system data throughput by 22%.

Accenture

Full Stack Engineering Senior Analyst

Hyderabad

March 2022 – June 2024

- Designed and implemented complex features aligned with detailed specifications, ensuring high performance and scalability.
- Debugged and resolved issues across development, testing, and production environments, ensuring seamless functionality.
- Engineered robust software solutions for new features and critical bug fixes.
- Developed comprehensive unit test cases and documentation using tools like Jasmine and Karma.
- Delivered high-quality, reusable, and scalable code adhering to industry best practice.
- Led project meetings, managed the request for-comment process, and provided technical leadership.
- Supported team initiatives, including onboarding and mentoring junior team members.
- Mentored and guided software engineers while actively participating in hiring top talent.
- Monitored team metrics, contributing to timely feature and fix delivery.
- Developed more than 100+ User Stories and many major features in the applications.
- Fixed more than 300+ defects in the application.

Accenture

Full Stack Engineering Analyst

Bengaluru

September 2020 – March 2022

- Developed and maintained user-facing features using HTML, CSS, SCSS, and JavaScript, ensuring responsive and visually appealing designs.
- Built scalable front-end architectures using Angular (v8+) and TypeScript to deliver modular and maintainable applications.
- Implemented and optimized reusable, component-based design patterns for enhanced code modularity and maintainability.
- Applied Object-Oriented Programming (OOP) principles to deliver high-quality, robust, and scalable codebase.
- Collaborated with back-end developers to integrate RESTful APIs and ensure seamless end-to-end functionality.
- Optimized web applications for speed, scalability, and cross-device responsiveness.
- Troubleshooted and resolved front-end performance bottlenecks and critical bugs to enhance user experience.
- Developed comprehensive unit test cases with Jasmine and Karma to maintain code quality and ensure zero regressions.
- Contributed to agile development practices by participating in sprint planning, code reviews, and daily stand-ups.
- Ensured accessibility and adherence to web standards for improved inclusivity and compliance.
- Partnered with cross-functional teams to align technical solutions with business requirements.

PROJECTS

- | | |
|--|------------|
| Smart Recommendation Engine <i>Python, FastAPI, Redis, Docker</i> | Month Year |
| <ul style="list-style-type: none">• Designed a Smart Recommendation Engine using collaborative filtering, increasing simulated user click-through rate by 14% and optimizing API latency under peak loads.• Integrated an AI-driven LLM fallback layer to process unstructured support queries, yielding a 94% accuracy rate in automated intent classification.• Architected system layout utilizing standalone microservices to separate computation-heavy model processing from standard data delivery paths. | |
| Real-Time AI Support Chatbot <i>Node.js, React, WebSockets, OpenAI API</i> | Month Year |
| <ul style="list-style-type: none">• Built a real-time conversational interface capable of handling concurrent multi-tenant chat rooms with a connection baseline response time of under 200ms.• Leveraged prompt engineering and structural contextual guardrails to prevent hallucination matrices during simulated automated customer workflows. | |

EDUCATION

- | | |
|---|------------------------|
| Your University Name | City, State |
| <i>Bachelor of Technology / Science in Computer Science and Engineering</i> | <i>Graduation Year</i> |

CERTIFICATION

- AI-900 Azure AI Fundamentals
- AZ-900 Azure Fundamentals

ACCOMPLISHMENT

- ACE'22 Preformer of the year Award, Accenture
- ACE'23 Extra Mile Award for offshore Individual, Accenture
- FY26 Applause Award, Deloitte
