

Ummadi Sreenivasulu

Full Stack Engineering Senior Analyst

PROFILE SUMMARY

As a proactive and adaptable software engineer, I thrive on embracing new challenges and staying abreast of cutting-edge technologies to enhance my career growth. Committed to adding significant value to my employer, I consistently seek opportunities to elevate my skills and contribute to the organization's success.

EDUCATION

2020 B.Tech/B.E.
Karunya University

WORK EXPERIENCE

Mar 2021 - Present Full Stack Engineering Senior Analyst
Accenture

- Developed a **Data Analytics Web Application**, taking full control of UI development from scratch
- Creating a variety of data visualizations for the application including **Bubble Charts, Visual Tree Mapping Charts, and Hierarchical Charts**.
- Designed and implemented new features to enhance application performance, introducing **lazy loading, typeaheads, and virtual scrolling**.
- Executed end-to-end feature development, ensuring seamless integration with a focus on **scalability and modularity**.
- Conducted unit testing using **Jasmine Framework and Karma Config** to ensure high code quality, utilizing tools like **SonarQube** for code quality assessment.
- Replaced **Power BI charts with D3.js** diagrams, resulting in a cost saving of **\$5,000** for the project.

- Hindi

Sep 2020 - Mar 2021 Full Stack Engineering Analyst

Accenture

- Developed a **SaaS Web application** from end to end, ensuring robust and scalable architecture.
- Implemented **MSAL authentication** to enhance security and streamline user access.
- Integrated **Power BI graphs** into the application for advanced data visualization.
- Consistently delivered requirements and resolved defects **within deadlines**, maintaining **high project standards**.
- Handled running and maintaining **CI/CD pipelines** in Azure DevOps, ensuring efficient and reliable deployment processes.
- Utilized version control tools such as **Github and Azure Repos** under **Azure Devops** for efficient code management and collaboration

Projects

6 Months

Detection of Alzheimers using Image Processing and Connectomes

- Gathered MRI data from the ADNI database, ensuring comprehensive data collection for analysis.
- Conducted data cleaning and processing to maintain accuracy and reliability of the dataset.
- Applied Convolutional Neural Networks (CNN) to develop predictive models, enhancing the ability to analyze and interpret MRI data.
- Technologies used: Python, NumPy, PyPlot, Pandas, CNN

COURSES & CERTIFICATIONS

- AZ-900 Azure Fundamentals
- Azure developer associate (az-204) by microsoft (Valid upto March 2024)
- AI-900 Azure AI Fundamentals

AWARDS

- ACE'22 Performer of the Year Award (Accenture)
- ACE'23 Extra Mile Award for offshore Individual
