📅 3 Years 6 Months Experience

👤 Profile

As a proactive and adaptable software engineer, I thrive on embracing new challenges and staying abreast of cutting-edge technologies to enhance my career growth. Committed to adding significant value to my employer, I consistently seek opportunities to elevate my skills and contribute to the organization's success.

📁 Professional Experience

03/2022 – present
Bengaluru, India

Full Stack Engineering Senior Analyst, Accenture

- Developed a **Data Analytics Web Application**, taking full control of **UI development** from scratch
- Creating a variety of **data visualizations** for the application including **Bubble Charts, Visual Tree Mapping Charts, and Hierarchical Charts**.
- Designed and implemented new features to enhance application performance, introducing **lazy loading, typeaheads, and virtual scrolling**.
- Executed end-to-end feature development, ensuring seamless integration with a focus on **scalability and modularity**.
- Conducted unit testing using **Jasmine Framework and Karma Config** to ensure high code quality, utilizing tools like **SonarQube** for code quality assessment.
- Replaced **Power BI charts with D3.js** diagrams, resulting in a cost saving of **\$5,000** for the project

09/2020 – 03/2022
Bengaluru, India

Full Stack Engineering Analyst, Accenture

- Developed a **SaaS Web application** from end to end, ensuring robust and scalable architecture.
- Implemented **MSAL authentication** to enhance security and streamline user access.
- Integrated **Power BI graphs** into the application for advanced data visualization.
- Consistently delivered requirements and resolved defects **within deadlines**, maintaining **high project standards**.
- Handled running and maintaining **CI/CD pipelines** in Azure DevOps, ensuring efficient and reliable deployment processes.
- Utilized version control tools such as **Github and Azure Repos** under **Azure Devops** for efficient code management and collaboration
- Improved the performance of the application significantly **80%**, by introducing Shared Modules, dissolving complex logic into simplified functionalities, removing boiler plate codes.

🎓 Education

2016 – 2020
Coimbatore, India

Karunya University, Computer Science Engineering

🧠 Skills

Programming Languages: Typescript • Java • Python • C# • JavaScript • SQL

Libraries/Frameworks: Angular • ASP.NET Web API • ASP.NET MVC • JQuery • Bootstrap • D3.js

Tools / Platforms: Visual Studio • Postman • PgAdmin • Visual Studio Code • Jupyter

Databases: MySQL • PostgreSQL • MongoDB

Development Traits: Agile Methodology • OOPS • Data Structures • Algorithms • Web Development

Certificates

AI-900 Azure AI Fundamentals [↗](#)

AZ-900 Azure Fundamentals [↗](#)

Projects

Detection of Alzheimers using Image Processing and Connectomes, *Python, Deep Learning, NumPy, Pyplot*

- Gathered MRI data from the ADNI database, ensuring comprehensive data collection for analysis.
- Conducted data cleaning and processing to maintain accuracy and reliability of the dataset.
- Applied Convolutional Neural Networks (CNN) to develop predictive models, enhancing the ability to analyze and interpret MRI data.
- Technologies used: Python, NumPy, PyPlot, Pandas, CNN

SaaS Web Application, *Angular, ASP.NET WebAPI, PostgreSQL, Bootstrap, PowerBI*

- Onboarded as Full Stack developer for this Project in Accenture. Some of my notable works in this project are developing Security layer for the application using MSAL (Microsoft Authentication Library)
- Collaborated effectively with cross-functional teams to understand application architecture, business requirements, and deadlines.
- Developing Application Components from Scratch and making sure that they are scalable and modular using Front end and Back end technologies and node.js
- Proactively identified and resolved issues and potential bugs during the development cycle to ensure high-quality deliverables.
- Utilized version control tools such as GitHub and Azure Repos under Azure DevOps for efficient code management and collaboration.

Asset Data Hub, *Angular, ASP.NET, D3.js, Knowledge Graphs, Azure Functions, Stardog*

- A data curation tool to provide insights on current market trends and record the update
- Used the advanced D3.js techniques and inculcated tree and graph data structures in order to draw the graphs for visual representation
- Engaged directly with clients to gain in-depth insights into their business needs and establish critical project milestones.
- Spearheaded the implementation of NUnit and Jasmine Karma tests, significantly boosting code coverage.
- Fostered seamless communication and collaboration within cross functional teams to comprehend the intricate architecture, business requirements, and priority deadlines.
- Led the development of robust Angular Components using Typescript and Bootstrap, integrated with ASP.NET to retrieve, process, and deliver data from databases based on user inputs

Achievements

ACE'23 Extra Mile Award for offshore Individual, *Accenture*

ACE'22 Performer of the year Award, *Accenture*
