Full Stack Engineer — Consultant

Results-driven Full Stack Consultant with a track record of bridging the gap between complex business requirements and technical implementation. Specializes in building modern web applications using .NET Web API, Angular, and React. Adept at stakeholder management and advising clients on cloud migration (Azure) and cost-optimization strategies, delivering measurable value including 5k+ savings and significant performance improvements for mission-critical workflows.

WORK EXPERIENCE

Deloitte Consultant (Full Stack Developer)

06/2025 – Present
Hyderabad, India

- Spearheading the development of robust web solutions using ASP.NET MVC and Web API, ensuring high availability and scalability for critical business functions.
- Developing dynamic, responsive user interfaces leveraging both Angular and React, creating a seamless cross-platform user experience (Hybrid Frontend Engineering).
- Designing complex schemas and optimizing Oracle SQL queries and stored procedures, significantly reducing data retrieval latency for high-volume transactions.
- Architecting secure RESTful endpoints to facilitate seamless communication between frontend clients and server-side logic.
- Enforcing strict coding standards and conducting code reviews to maintain clean, maintainable, and efficient codebases.
- Collaborating directly with client stakeholders to translate complex business requirements into scalable technical architectures using .NET and React.

Accenture Full Stack Engineering Senior Analyst

09/2020 – 06/2025
Bengaluru, India

- Architected a Data Analytics Web Application from scratch using Angular, ASP.NET, and Stardog (Knowledge Graphs).
- Cost Reduction: Replaced licensed Power BI charts with custom D3.js visualizations, resulting in \$5,000+ in project cost savings.
- Performance Tuning: Enhanced application load times by implementing lazy loading, virtual scrolling, and typeaheads.
- Developed comprehensive unit tests using Jasmine, Karma, and NUnit, ensuring 90% code coverage.
- Performance Boost: Improved overall application performance by 80% through the implementation of Shared Modules and removal of boilerplate code.
- Designed a secure authentication layer using MSAL (Microsoft Authentication Library) to streamline user access.
- Managed Azure DevOps CI/CD pipelines, ensuring efficient, automated deployment processes.
- Developed 100+ User Stories and resolved 300+ defects, maintaining strict adherence to SLAs.
- Designed and implemented complex features aligned with detailed specifications, ensuring high performance and scalability.
- Debugged and resolved issues across development, testing, and production environments, ensuring seamless functionality.
- Engineered robust software solutions for new features and critical bug fixes.
- Developed comprehensive unit test cases and documentation using tools like Jasmine and Karma.
- Delivered high-quality, reusable, and scalable code adhering to industry best practices.
- Led project meetings, managed the request-for-comment process, and provided technical leadership.
- Supported team initiatives, including onboarding and mentoring junior team members.
- Monitored team metrics, contributing to timely feature and fix delivery.

- Developed more than 100+ User Stories and many major features in the applications.
- Mentored and guided software engineers while actively participating in hiring top talent.
- Fixed more than 300+ defects in the application.

Full Stack Engineering Analyst

Bengaluru, India

- Developed and maintained user-facing features using HTML, CSS, SCSS, and JavaScript, ensuring responsive and visually appealing designs.
- Built scalable front-end architectures using Angular (v8+) and TypeScript to deliver modular maintainable applications.
- Implemented and optimized reusable, component-based design patterns for enhanced code modularity and maintainability.
- Applied Object-Oriented Programming (OOP) principles to deliver high-quality, robust, and scalable codebase.
- Collaborated with back-end developers to integrate RESTful APIs and ensure seamless end-to-end functionality.
- Optimized web applications for speed, scalability, and cross-device responsiveness.
- Troubleshoot and resolved front-end performance bottlenecks and critical bugs to enhance user experience.
- Developed comprehensive unit test cases with Jasmine and Karma to maintain code quality and ensure zero regressions.
- Contributed to agile development practices by participating in sprint planning, code reviews, and daily stand-ups.
- Ensured accessibility and adherence to web standards for improved inclusivity and compliance.
- Partnered with cross-functional teams to align technical solutions with business requirements.

EDUCATION

Bachelor of Technology in Computer Science Engineering

Karunya University • GPA: 8.0

Coimbatore • 01/2016 – 01/2020

CERTIFICATIONS

AI-900: Microsoft Azure AI Fundamentals

Microsoft Azure

AZ-900: Microsoft Azure Fundamentals

Microsoft Azure

AWARDS & SCHOLARSHIPS

Applause Award for extended cooperation

Deloitte

09/2025

ACE'23 Extra Mile Award

Accenture

01/2023

ACE'22 Performer of the Year

Accenture

01/2022

PROJECTS

Alzheimer's Detection (Deep Learning)

- Gathered MRI data from the ADNI database, ensuring comprehensive data collection for analysis.
- Conducted data cleaning and processing to maintain accuracy and reliability of the dataset.
- Applied Convolutional Neural Networks (CNN) to develop predictive models, enhancing the ability to analyze and interpret MRI data.
- Technologies used: Python, NumPy, PyPlot, Pandas, CNN.

Asset Data Hub (Analytics Web App)

- Developed a Data Analytics Web Application, taking full control of UI development from scratch.

- Created a variety of data visualizations for the application, including Bubble Charts, Visual Tree Mapping Charts, and Hierarchical Charts.
- Designed and implemented new features to enhance application performance, introducing lazy loading, typeaheads, and virtual scrolling.
- Executed end-to-end feature development, ensuring seamless integration with a focus on scalability and modularity.
- Conducted unit testing using Jasmine Framework and Karma Config, ensuring high code quality and leveraging tools like SonarQube for code quality assessment.
- Replaced Power BI charts with D3.js diagrams, resulting in a cost saving of \$5,000 for the project.
- Leveraged advanced D3.js techniques and implemented tree and graph data structures to create dynamic and visually appealing graphs.
- Engaged directly with clients to understand their business needs and establish critical project milestones, ensuring alignment with objectives.
- Spearheaded the implementation of NUnit and Jasmine Karma tests, significantly boosting code coverage and application reliability.
- Fostered seamless communication and collaboration within cross-functional teams to comprehend complex architecture, business requirements, and priority deadlines.
- Led the development of robust Angular components using TypeScript and Bootstrap, integrated with ASP.NET to retrieve, process, and deliver data from databases based on user inputs.

SaaS Web Application

- Developed a SaaS Web application from end to end, ensuring robust and scalable architecture.
- Designed and implemented a secure authentication layer using MSAL (Microsoft Authentication Library) to enhance security and streamline user access.
- Integrated Power BI graphs into the application for advanced and dynamic data visualization.
- Consistently delivered requirements and resolved defects within deadlines, maintaining high project standards and client satisfaction.
- Handled running and maintaining CI/CD pipelines in Azure DevOps, ensuring efficient and reliable deployment processes.
- Utilized version control tools such as GitHub and Azure Repos within Azure DevOps for seamless code management and team collaboration.
- Improved application performance by 80% through the introduction of Shared Modules, simplifying complex logic, and removing boilerplate code.
- Developed scalable and modular application components from scratch using Front-End and Back-End technologies, including Node.js

SKILLS

- **Frontend:** Angular (v8+), Bootstrap, CSS3/SCSS, D3.js, HTML5, JavaScript (ES6+), React.js, TypeScript
- **Backend:** ASP.NET MVC, ASP.NET Web API, C#, .NET Core, Node.js, RESTful APIs
- **Database:** Oracle SQL, PostgreSQL, SQL Server
- **Cloud & DevOps:** Azure (AI-900, AZ-900 Certified), Azure DevOps, CI/CD Pipelines, Docker
- **Tools & Concepts:** Agile/Scrum, Data Structures & Algorithms (DSA), Git, Jasmine, Karma, MSAL (Auth), SonarQube
