SUMMARY

With more than three years of experience in Full Stack Development, I possess advanced skills in technologies such as Angular and ASP.NET. I have successfully functioned as a Full Stack Engineer across various projects, demonstrating proficiency in managing application login mechanisms through the effective utilization of the Microsoft Authentication Library, along with expertise in UX integrations, data visualization, and data flow handling throughout applications. I am dedicated to delivering project requirements within designated timelines. Furthermore, I prioritize the seamless integration of new components and features to ensure they optimize existing workflows without compromising scalability, thereby enhancing overall development processes.

SKILLS

Programming Languages TypeScript, Java, Python, C#

Web Frameworks Angular, ASP.NET MVC

Front-End Frameworks Bootstrap, JQuery

APIs ASP.NET Web API, REST

Databases MySQL, PostgreSQL, MongoDB

LeetCode https://leetcode.com/sreenu_ummadi/

GitHub <https://github.com/sreenu-dev>

Languages English, Japanese, Telugu, Tamil

EXPERIENCE

Full Stack Engineering Senior Analyst

Sep '20 — Present

Accenture

Bengaluru, India

- Design, Develop and Implement new Features along with Optimizing and improving Performance of the Application
- End to End development of features and integrating it with the Application with Scalability and Modularity features
- Oversee the full software development life cycle, including requirements gathering, design, development, testing, and deployment
- Implement and manage Agile development methodologies
- Drive innovation through the introduction of new technologies and best practices
- Investigated system issues and implemented resolutions to reduce downtime.
- Performed system analysis, documentation, testing, implementation, and user support for platform transitions.
- Developed and maintained clear documentation for methodologies and applications.
- Translated customer requirements into written use cases
- Minimized Development time by introducing custom coding standards
- Researched and installed web server and development software.
- Developed and maintained web applications following specifications provided.
- Participated in team development of divisional standards for technology use.
- Used critical thinking skills, decisive judgment and worked with minimal supervision.
- Designed reusable and reliable code for use within distributed cloud environments.
- Integrated constructive programs into cohesive product.
- Revised, modularized and updated old code bases to modern development standards, reducing operating costs, and improving functionality.

PROJECTS

Asset Data Hub

Present

- Proactively identified and resolved issues and potential bugs during the development cycle to ensure high-quality deliverables.
- Utilized version control tools such as GitHub and Azure Repos under Azure DevOps for efficient code management and collaboration.
- Fixing Production issues and adhering to coding standards while developing Asset Data Hub Angular, ASP.NET, D3.js, Knowledge Graphs, Azure Functions, Stardog
- A data curation tool to provide insights on current market trends and record the update
- One of the requirement is we need to get the data from Stardog and plot the graphs using D3.js and knowledge graphs

- Used the advanced D3.js techniques and inculcated tree and graph data structures in order to draw the graphs for visual representation
- Engaged directly with clients to gain in-depth insights into their business needs and establish critical project milestones.
- Spearheaded the implementation of NUnit and Jasmine Karma tests, significantly boosting code coverage.
- Fostered seamless communication and collaboration within cross-functional teams to comprehend the intricate architecture, business requirements, and priority deadlines.
- Led the development of robust Angular Components using Typescript and Bootstrap, integrated with ASP.NET to retrieve, process, and deliver data from databases based on user inputs.

SaaS Web Application, Accenture	Bengaluru, India
• Onboarded as Full Stack developer for this Project in Accenture. Some of my notable works in this project are developing Security layer for the application using MSAL (Microsoft Authentication Library) • Collaborated effectively with cross-functional teams to understand application architecture, business requirements, and deadlines. • Developing Application Components from Scratch and making sure that they are scalable and modular using Front end and Back end technologies and node.js • Proactively identified and resolved issues and potential bugs during the development cycle to ensure high-quality deliverables. • Utilized version control tools such as GitHub and Azure Repos under Azure DevOps for efficient code management and collaboration. • Fixing Production issues and adhering to coding standards while developing	

EDUCATION

Bachelor's in Computer Science and Engineering , Karunya University Coimbatore (GPA: 8.0)	Aug '16 — Oct '20
- Majored in Computer Science and Engineering	Coimbatore, India
Secondary Education in Maths, Physics and Chemistry , Bhavan Junior Colloege Proddatur (GPA: 83.5%)	Aug '14 — Oct '16
Studies Advanced Level of Mahs, Physics, Chemistry and Obtained More than 80%	Proddatur
Primary Education in Primary Education , Sri Chaitanya Sc Proddatur (GPA: 9.3)	
Got 9.3 CGPA	Proddatur

AWARDS

ACE'22 Performer of the Year Award	Jan '01
